Re: RoHS/WEEE Directives

Phoenix Tube Co., Inc produces austenitic stainless-steel tubing and flat bar.

Phoenix Tube does not use or add Lead, Mercury, Cadmium, Hexavalent Chrome, Polybrominated Biphenyls (PBBs), Polybrominated Diphenyl Ethers (PBDEs), or any of the EU RoHS 10 substances anywhere in its manufacturing process.

Therefore, Phoenix Tube meets "Restriction of the use of certain Hazardous Materials" (RoHS) issued by the Council and the European Parliament of the European Union (EU). This includes the EU directive regarding the End of Life Directive (ELV) Directive 2000/53/EC, RoHS Directive 2002/95ED and RoHS Directive 2015/863.

RoHS works in conjunction with the EU WEEE Directive (Waste Electrical & Electronic Equipment). RoHS supports WEEE regarding the use of the same deemed hazardous materials noted in RoHS. Therefore, Phoenix Tube meets the EU WEEE Directive as well.

Sincerely,

Charles H Kissinger
Engineering Manager
Phoenix Tube Co., Inc.
